

Presentation Mode allows you to share and control the document you wish to discuss with the witness and other attendees. You can annotate, zoom and quickly change pages. You can also give the Witness control of the document presentation allowing them to annotate, zoom and change pages as well.

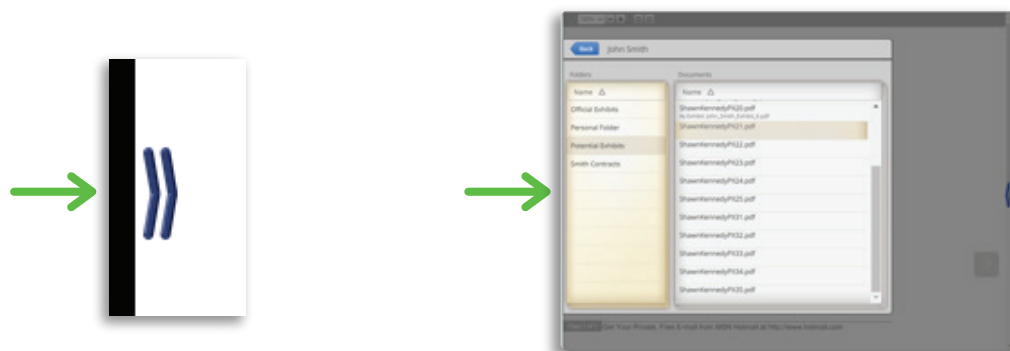

- 1 Select the Presentation icon  and  your presentation.

- 2 Annotate, zoom or change pages as you wish. The Witness will see your activity along with other attendees who have joined the presentation. **BE AWARE** that any action or document you bring up in Presentation Mode will be seen by all participants.

- 3 To select other documents during Presentation Mode, select the **FOLDER/DOCUMENT** slider icon to access your folders and documents within a document.

- 4 To give the Witness control, select the icon and instruct the Witness to change pages or annotate using Witness annotation tools.

- 5 With **PAUSE/PLAY**, you can **PAUSE** a document to the viewers, search through your other documents and then **PLAY** when you are ready. This allows you to dig through your virtual box of documents during Presentation Mode without others seeing what documents you're viewing.
